

Join us for the

PARTNERSHIPS FOR SUSTAINABLE GROWTH

Networking Event

3.00-5.00pm, Sunday 11 February,
Room 403, Kuala Lumpur Convention Centre

LESSONS FROM AUSTRALIA & INDONESIA

Please help us scope an innovative proposal for the **CITY PARTNERSHIPS CHALLENGE** – a capacity development and facilitation initiative of the UN Global Compact – Cities Programme that supports cross-sectoral multi-partner sustainable urban development projects

*At this event,
you will learn...*

- ☑ How to successfully plan new towns
- ☑ Flood mitigation strategies
- ☑ How to achieve effective change through community action
- ☑ What partnerships truly mean

The City Partnerships Challenge is a contribution by UN Global Compact to the UN Implementation Facility for Sustainable Urban Development (IFSUD) that aims to catalyse effective, coordinated and results-based implementation of integrated sustainable urban development solutions.

The focus is on the sustainable development of new towns in Indonesia.

- Many towns are earmarked for river and coastal locations
- These are places where people living in informal settlements are most vulnerable and lack legal status
- Poor planning, climate change and inadequate environmental protections coalesce to create serious flood conditions on a regular basis.

If you can't make it to this event and would like to get involved, please email us at earophaus@gmail.com
